

DANIEL ARCE

Senior Front-End Developer • darce.xyz • daniel.arce@gmail.com • (416)754-2356 • Toronto, ON

SUMMARY

Senior Front-End Developer and product engineer with 14+ years building accessible, user-facing software in React/TypeScript, Next.js, and Jamstack. Led WCAG 2.1 remediation and reusable component work for platforms serving 80,000+ users, helping protect \$9.2M ARR in institutional contracts. Now building AI-assisted accessibility tooling with a focus on reviewable workflows, media systems, and compliance.

SKILLS

- **Design Systems:** Radix UI, design tokens, theming (CSS variables)
- **Frameworks & Languages:** React, Next.js, TypeScript, Node.js, Web Components, SCSS/Sass, Redux, REST APIs, Jamstack
- **Compliance & Accessibility:** WCAG 2.1, ARIA, keyboard navigation, screen reader optimization
- **Testing:** Cypress (E2E & component), Jest, Mocha
- **Tooling & DevOps:** Webpack, Babel, Rollup, ESLint, Git, CI/CD (GitHub Actions, Jenkins)
- **Collaboration:** Agile/Scrum, Product/UX, Design, Compliance teams, External auditors
- **Languages:** Fluent in English, French, and Spanish

EXPERIENCE

WorkBay, Creator, Open source

Jun 2026 - present

Open-source workflow state for AI coding clients. [Case study](#)

- Design task, implementation, review, recovery, and handoff workflows shared across Claude Code, Codex, Cursor, grok, and Copilot.
- Build durable state and Git/test gates so developers can switch agents mid-task without losing review findings, decisions, or test evidence.

AltContext.com, Founder / Developer, Toronto, ON

Mar 2025 - present

WordPress plugin for image accessibility: context-aware alt text and tenant-scoped face recognition for media libraries. MVP targeted for Q4 2026.

Open-source workflow state for AI coding clients.

- Building the React admin UI and WordPress integration for reviewing face recognition and AI-generated alt text before applying changes.
- Defined API contracts, tenant isolation, acceptance tests, and release gates for production-ready AI features.

Catch Insurance, Accessibility and React Consultant (Contract), Remote, Toronto, ON

Aug 2024 - Feb 2025

U.S. health insurance and benefits SaaS startup ().

- Owned accessibility remediation, reducing delivery risk for the Aetna partnership milestone.
- Built modular React/TypeScript components in Gatsby with Radix UI and Zustand, integrating REST APIs and authentication workflows.
- Standardized UI patterns with CSS variables, component composition, Webpack/Babel tooling, and Cypress E2E/component tests.

PhotoShelter, Senior Front-End Developer, New York, NY

Sep 2018 - Feb 2022

Cloud-based Digital Asset Management platform serving 80,000+ users. [Case study](#)

- Led WCAG 2.1 remediation for core product workflows, including keyboard navigation across Polymer/Web Components and Shadow DOM.
- Established accessibility standards (component patterns and review checklists) adopted by the team to scale remediation.
- Helped retain \$9.2M ARR in key client contracts by closing accessibility gaps and mentoring four developers on review standards.
- Prototyped a React workflow-automation interface, surfacing integration issues and reducing development time by about 30%.

Apple Inc., Senior Front-End Developer (Contract), Sunnyvale, CA

Jul 2017 - Mar 2018

- Delivered responsive, pixel-perfect landing pages for the iPhone X launch in collaboration with Apple's marketing team.
- Developed a CSS-animated email campaign; 92% open rate, internally reported.
- Streamlined email campaign processes by building CLI automation tools in Node.js, Bash, and Gulp.

Early Career

Publicis North America, Senior Interactive Developer, New York, NY

2010 - 2017

- Upgraded Citibank's citirewards.com to WCAG AAA, beyond AA baseline expectations

2015 - 2017

MSNBC, Senior Design Technologist and Front-End Developer, New York, NY

2012 - 2015

- Prototyped and launched a live video platform in six months with an in-house team and vendors, averting partner litigation.
- Contributed to the in-house CMS with AngularJS components, integrating with a Drupal backend.

The Huffington Post / AOL, UI Engineer, New York, NY

2010 - 2012

- Contributed to a 30% faster First Contentful Paint for 3M+ monthly visitors via front-end optimizations.

Selected Projects

- barbarabeirne.com: Recovered and rebuilt a photographer's archive from a defunct Flash site, later rewritten with Web Components. 2026
- darce.xyz: Personal portfolio. Next.js + MDX publishing pipeline (Jamstack: frontmatter, static site generation). 2024
- bauhausdances.org: Custom WordPress theme with self-hosted video and caching. 2023
- [Texting Syria](#): SMS texting app using the Twilio API, an artistic collaboration with Canadian photojournalist Liam Maloney. 2014

EDUCATION

- **Full Stack Open**, University of Helsinki online course (React, TypeScript, Node.js, testing) 2022
- **NYU Tisch School of the Arts**, MPS, Interactive Telecommunications, New York
- **Concordia University**, BFA, Interdisciplinary Studies, Studio Arts, Montreal
